AN ACT relating to health care; expanding immunity from certain liability for health care providers who use a health information exchange; requiring certain health care records to be created, authenticated and stored on a computer system that meets certain requirements; and providing other matters properly relating thereto.

Legislative Counsel’s Digest:

1 Existing law provides that a health care provider who with reasonable care
2 relies upon an apparently genuine electronic health record accessed from a health
3 information exchange to make a decision concerning the provision of health care to
4 a patient is immune from civil or criminal liability for the decision if: (1) the
5 electronic health record is inaccurate; (2) the inaccuracy was not caused by the
6 health care provider; (3) the inaccuracy resulted in an inappropriate health care
7 decision; and (4) the health care decision was appropriate based upon the
8 information contained in the inaccurate electronic health record. (NRS 439.593)

9 **Section 1** of this bill expands this immunity from liability to also apply to any
10 health care provider who: (1) submits an apparently genuine electronic health
11 record to a health information exchange; (2) accesses an apparently genuine
12 electronic health record from a health information exchange; or (3) utilizes or
13 discloses an apparently genuine electronic health record accessed from a health
14 information exchange.

15 Existing law authorizes the creation, authentication and storage of health care
16 records on a computer system that is part of a health information exchange.

17 (NRS 629.051) Beginning on January 1, 2028, **sections 2 and 4** of this bill require,
18 with certain exceptions, the creation, authentication and storage of health care
19 records on a computer system that is part of a health information exchange and
20 allows patients to access and forward their health care records electronically.
