Sources: Nevada State Board of Medical Examiners (2024), Nevada State Board of Osteopathic Medicine (2024), Nevada State Demographer's Office (2023), and American Medical Association (2024). All data refer to allopathic (MD) and osteopathic (DO) physicians with an active license to practice in Nevada. Licensure data was retrieved from the licensing boards on February 1, 2024. Notes: Red figures denote rates lower than the U.S. average and green figures denote rates at or greater than the U.S. average. Physician per 100,000 population rates utilize county and statewide population estimates from the Nevada State Demographer's Office. Rates for the following three specialties utilize age-specific sub-populations estimates: Geriatric (population aged 65 and over), Obstetrics/Gynecology (women aged 18 and over), and Pediatric Medicine (population under the age of 18). Analysis was performed by the Nevada Health Workforce Research Center, Office of Statewide Initiatives, University of Nevada, Reno School of Medicine.
